# INVESTMENT STRATEGIES

## DIGITAL ASSETS TRADING

The complex nature of the Digital Asset universe requires a specialised approach and detailed analysis to identify relative value.

### Investment Approach

The strategy's investment objective is to provide stable returns mainly through income generation via a diversified portfolio of specialised digital assets.

## GLOBAL EQUITY-MUTUAL FUNDS

### Investment Approach

We seek to provide long-term capital appreciation by investing primarily in global companies with strong competitive positions, defensible barriers to entry, long-term growth prospects and competent management teams.

Our team of portfolio managers acquires ownership stakes in these companies at prices below its assessment of their true value.

## REAL ESTATE AND PRIVATE MARKETS

### Investment Approach

One approach involves purchasing units in a 'real estate private equity fund'. As asset manager we are able to create value (Cheaper acquisitions thanks to a strong sourcing platform, identification of 'off-market' transactions, converting or repositioning existing buildings to allow for yield compression, etc)
